

Meet... iNOVO+ by IntelliHeat

THERMODYNAMIC FLUID FILLED - WI-FI ELECTRIC RADIATORS

The **i-Novo+ Wi-Fi electric radiators** range are manufactured with pure aluminium providing added durability and lightweight radiators. The operation of the lcd thermostat is very simple and allows the user to adjust the heating program to your daily/weekly routine. The built-in Wi-Fi module allows remote control of the heating system (with any smartphone or tablet) using the dedicated Free User-friendly Heating Control App. Maximum quality manufacturing and design ensures that iNovo models are extremely robust, supported by extensive and comprehensive 2 + 5 years warranty.

A slim classically stylish ergonomic design to suit any interior, the iNovo + ensures a perfect combination of performance and energy saving.

○ Technical specifications

- 100% aluminium body
- Fully Wi-Fi - (NO Hub or receivers)
- Wall-mounting brackets and drilling template provided
- PID (Proportional Integral Derivative) control by ASC.
- Integrated safety limiter for overheating protection
- 6 modes: Off, Standby, Frost protection, Comfort, Eco, Pilot wire
- Electronic accurate temperature regulation
- Geolocation function - Invite users function.
- UKCA, BS, BEAB Certifications - Performance - IP24

○ Features

- Power on/standby mode
- Operating modes: Auto, Comfort, Eco, Frost protection
- Power energy consumption display
- Open Window Detection
- 7 day and daily programme
- Temperature setting limit
- Child anti-tamper: keypad lock
- Rental housing safety: PIN code lock
- Voice control: Amazon Alexa and Google Assistant.

Advanced technologies, remote wi-fi control abilities and design substantially lower operating running costs creating a perfect balance between set-point temperature and comfort. Never again will you have to worry about wasting energy by accidentally leaving your heating on, the iNovo +® is packed with state of the art energy saving features, the iNovo + Wi-Fi electric radiator is the perfect choice for private, commercial and rented properties. The iNovo is fully compliant with all the requirements of LOT 20 Eco-design for Energy-Related Products Regulations 2018/2020 with a 39% Energy Efficiency score rating.

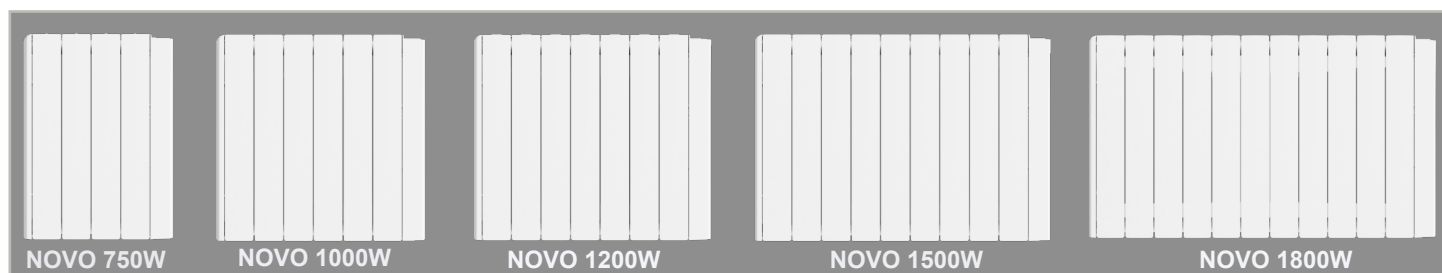

Benefits

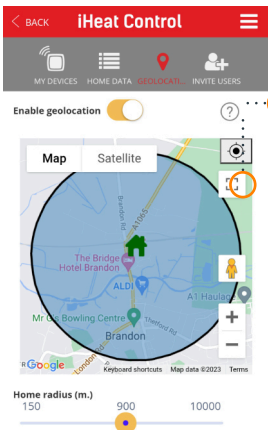

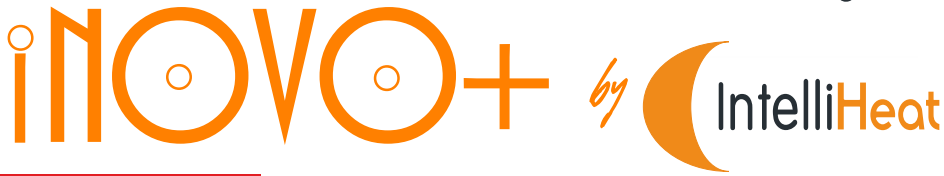

- Smart Electric Radiator controllable remotely via downloadable free App on any smartphones or mobile devices.
- Compatible with Google Home and Alexa
- Robust 100% Aluminium body:
 - quickly reaches the desired set-point temperature
- Backlight LCD thermostat incorporated
- NTC temperature probe and electronic advanced temperature regulation
- In order to optimise energy consumption, the Smart Radiator provides:
 - Daily and weekly programming with Adaptive Start Control
 - Open window detection function
 - Energy Consumption display
- Safety:
 - Keyboard lock
 - Built-in ON/ OFFswitch
 - Power memory reserve > 2h
- Fixing and wall brackets system included

Advanced Heating Solutions

○ GEOLOCATION function.

The goal of this feature is to turn the radiator off or on automatically, avoiding energy wastage.

○ Meet our User-friendly APP ...

○ OPENWINDOW DETECTION

By identifying an open window in the room, the radiator turns off automatically, avoiding energy wastage

○ ADAPTIVE START CONTROL

When in Program mode, this smart function will start the radiator at the perfect time based on the current room temperature

○ PROGRAM

Easily set a 24/7 heating schedule routine for your Smart Radiators

○ TEMPERATURES SET-UP

Customise the Max, Comfort and Eco background temperatures (with 0.5°C Accuracy), and monitor your Energy consumptions.

○ MODE

- ⌚ Temporary (Boost)
- 👤 Manual (5 modes)
- 🕒 Program

○ SECURITY LOCK

Lock and unlock the radiators remotely to prevent tampering and assure children's safety

○ TEMPERATURES MONITORING

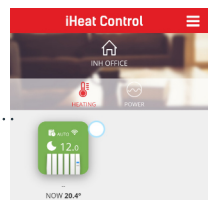

Monitor the room temperature trend with real-time Energy consumptions

○ GROUPS OF DEVICES

Arrange the radiators into groups or areas and control multiple Radiators at the same time

○ VOICE CONTROL ACTIVATION

Compatible with alexa works with the Google Assistant

Back-lit control thermostat with digital display.
